EDUCATION

President University

Bekasi, Indonesia

B.Sc. in Informatics (GPA: 3.89/4.00)

September 2022 – December 2025

- 70% Scholarship Awardee
- Relevant Coursework: Artificial Intelligence, Database Systems, Data Structures & Algorithms, Deep Learning, NLP, Statistics.

WORK EXPERIENCE

Grab Indonesia

South Jakarta

Grabfood Expansion Project Intern

November 2025 – Present

- Automated a merchant photo template generation pipeline using Python, processing 500+ images per cycle and reducing turnaround time by 85%, enabling faster and scalable marketplace deployment.
- Led analytics initiatives across 100+ cities by building scalable dashboards to analyze weather trends, delivery performance, and seasonal events, driving data-informed decisions for revenue optimization and operational planning using Python, SQL, and Google Sheets.
- Improved merchant photo quality across 100+ Tier-4 cities by developing automation solutions to increase hero and listing photo penetration, enhancing homepage performance and content consistency using Python and Google Apps Script.
- Developed ETL pipelines on Databricks to automate data extraction from Superset into Google Sheets, reducing manual reporting effort by 60% and improving data availability for stakeholders.

PT XLSMART

South Jakarta

Data Analytics Intern - People

January 2025 – May 2025

- Deployed Metabase on Google Cloud Run with PostgreSQL, enabling real-time data access and reducing manual requests by 80% for the People directorate.
- Built 10+ dashboards in Metabase and Google BigQuery to support KPI tracking, survey analysis, and organizational decisions.
- Designed Power BI dashboards to monitor employee learning trends, resulting in a 70% increase in training engagement and effectiveness.
- Collected, cleaned, and validated large datasets using Python and SQL, ensuring accuracy for analytics and predictive modeling.

PT XL Axiata

South Jakarta

HC Digitalization & Resource Management Intern

September 2024 – December 2024

- Developed and deployed full-stack web applications on Google Cloud App Engine using Laravel, automating workflows for employee competition registration.
- Automated data randomization and renaming processes, optimizing survey operations and management files by reducing manual effort by 75%.
- Built an AI-powered SQL chatbot (OpenAI LLMs) to query warehouse data, improving accessibility of insights for non-technical teams.
- Managed and maintained 150+ KPI and SOW datasets, ensuring 100% compliance and accuracy in digital infrastructure while streamlining reporting processes and supporting data-driven decisions.
- Collaborated with 5+ stakeholders and divisions to improve project efficiency, enhancing cross-functional communication and interpersonal relationships.

ID/X Partners X Rakamin Academy

Project-Based Virtual Intern: Data Science

June 2024 – July 2024

- Leveraged data science techniques to analyze real-world financial datasets in business case projects, improving analysis efficiency by optimizing data processing workflows.
- Developed a robust machine learning model for Credit Risk Analysis, achieving an accuracy of 96.5%, while proactively learning new tools and techniques to enhance project outcomes

ORGANIZATION EXPERIENCE

Google Developer Student Club ITB

Member

November 2022 – November 2023

- Selected for the specialized Data Science and Machine Learning track; completed final project and awarded a certificate of achievement for fulfilling all program requirements.

- Developed practical expertise in data visualization using Matplotlib, Pandas, and NumPy, and engaged in technical workshops and webinars to further expand skills.

PROJECTS

Retrieval Augmented Generation (RAG) System

January 2025 – July 2025

- Collaborated with a team of 3 to develop a Retrieval-Augmented Generation (RAG) chatbot using FastAPI and OpenAI LLMs, achieving an F1-score of 85.2% and improving response accuracy.
- Streamlined Human Capital (HC) workflows by designing a chatbot solution that enables instant access to accurate and relevant information, improving operational efficiency and reducing dependency on manual processes.
- Reduced manual employee queries by 90% by implementing an automated knowledge retrieval system, ensuring consistent, reliable, and professional responses across internal communications.

CurhatBot: An LSTM-Based Chatbot For Mental Health Support

April 2024 – May 2024

- Developed a deep learning chatbot using LSTM, achieving 99.57% accuracy over 1000 epochs for mental health support queries.
- Handled end-to-end development including data preprocessing, tokenization, padding, label encoding, training, and evaluation.

AI-Powered Diet System

July 2024 – July 2024

- Developed a web-based diet assistant using Django, integrating food detection with MobileNetV2 and CNN across 41 classes (97.7% training, 89% validation accuracy)
- Implemented XGBoost for calorie burn prediction and linear regression for body fat estimation, and integrated a Gemini LLM API with web scraping for personalized dietary recommendations.

CERTIFICATIONS

- **Data Engineering & Analytics:** ETL in Python and SQL (LinkedIn Learning), SQL (Advanced), SQL (Intermediate), SQL (Basic) — HackerRank, Data Analysis Fundamentals (MySkill), Data Science (MySkill)
- **Machine Learning:** Belajar Machine Learning untuk Pemula — Dicoding
- **Data Visualization:** Belajar Dasar Visualisasi Data — Dicoding

SKILLS

Data & BI Tools: Power BI, Metabase, Google BigQuery.

Programming: Python, SQL, Java

Frameworks & Libraries: FastAPI, Flask, Django, Streamlit, TensorFlow

Cloud & Tools: Google Cloud (App Engine, Cloud Run), Git, Microsoft Office

Data Science: Data Preprocessing, Data Visualization, Machine Learning, Deep Learning, Predictive Modeling

Languages: English (Advanced), Indonesian (Native)
